## *Our Numbers Have Changed*

Dear Clients,  
Please note our contact numbers have changed. Please update your phone directories so you can continue to contact us uninterrupted:

Our office Contact numbers are as follows  
(Office Hours : 10 am – 7 pm- Monday to Saturday)

022-41238137  
022-41238770  
022-41223400  
022-41223500  
022-41223600

Alternatively you may reach us for urgent enquiries on :

91-9323909900  
91-9320000033

## Research & Development Focus + Mobile Laboratory Testing Facility

At Chemcleanzio, we believe in innovation for the objective of delivering added value to our clients.

Chemcleanzio has over the last few months increased focus and specific product scales and is developing compounds that allow us to effectively clean the hardest / most difficult form of scales.

Chemcleanzio can target even the most difficult scale through proper research and planning. We first analyze the scale in our laboratory to understand the properties of the scale and then develop a compound of chemicals that can dissolve the scale while ensuring the MOC of the equipment is not adversely impacted.

Jobs Executed this month:

- Chemical Cleaning of Sodium Hydroxide Tankers
- Over 3000 inch meter of pipeline by bath pickling method
- Acid pickling of Hydraulic systems at Steel Plant
- Alkali Boil out for 50 MW – Power Plant Boiler
- Shutdown of Ammonia Plant

Equipments added this month

- HACH Calorimeter
- Gear Pumps
- Pumps : 400m<sup>3</sup>/hr – 50 mtr head x 2
- Laboratory Equipments : Weighing machine, Hot Plate, Water Bath, Thermostatic Range

Our equipments are available on hire

This research helps us save time onsite and ensure you don't have to spend days cleaning the equipment manually

Harder the scale and more challenging it is for us to resolve it – the more we enjoy resolving the scale.

Please feel free to contact us if you would like to know more about Scale analysis and dissolution

## Mobile Laboratory available .. You can now hire our mobile laboratory facility to conduct various tests onsite

Chemcleanzio runs a completely equipped mobile laboratory setup with the chemical cleaning undertaken onsite. Our laboratory is available on hire and is currently equipped to handle the following tests :

- Water Analysis : Chloride, Phosphate, Silica Content, Turbidity, Conductivity, TDS
- Oil Analysis : NAS Value
- Chemical Cleaning Analysis : Oil & Grease Content, Iron Content, Chemical Percentage, pH
- Effluent Tests : COD, Color, Floride, Ammonical Nitrogen, pH

Equipments available:

1. HACH Calorimeter
2. HACH Particle Counter
3. Turbidity Meter
4. Oil Analysis Kit
5. Titration Kit
6. HACH Reagents
7. All Testing chemicals
